José David Flórez

Junior Fullstack Developer

PROFILE

Computer Systems Engineer with a year of hands on software development experience, skilled in multiple programming languages and database management. I am seeking to apply my logical and resilient approach to challenging projects and grow professionally within a Full Stack development environment.

TRAINING

Junior Fullstack Developer
Campuslads, Florodablanca — September 2024 – 2025

Computer Systems Engineering
Saint Leo University, Tampa Fl. — March 2023 – Now

High School Diploma
Colegio Franciscano del Virrey Solís — 2022

EXPERIENCE

CampusLove
Campuslands

"Tinder" Console Simulator Developed in C# with PostgreSQL. Simulates match-making logic, user profiles and a personalized feed in a CLI.

Formula 1 Simulation
Campuslands

Collaborative development of a dynamic web application for Formula 1 simulation, which allows users to run simulations for pole-position qualifying and full race events, utilizing a JSON server for data management.

Task List
Saint Leo University

Development of a web application focused on task management, built with Python and the Flask framework. The application utilizes an SQLite database for persistent data storage and is deployed on PythonAnywhere, allowing users to create, track, and manage their tasks effectively.

SKILLS

- Python
- Java Script
- C#
- ASP.NET
- CSS
- HTML
- Git
- PostgreSQL
- MySQL

ABILITIES

- Resilience
- Teamwork
- Adaptability
- Discipline
- Problem solving
- Analytical Thinking
- Proactivity

PERSONAL DATA

- Linkedin
- GitHub
- Portfolio
- jose.david.florez.navarrete@gmail.com

LANGUAGES

- Spanish - Native
- English - C1
